ApogeeX - Best Execution Policy

This Best Execution Policy is issued by **ApogeeX Capital LLC** ("ApogeeX", "we", "us" or "our"), a limited liability company registered in Saint Vincent and the Grenadines under company number **4536 LLC 2026**, with its registered office at Suite 305, Griffith Corporate Centre, Beachmont, Kingstown, St. Vincent and the Grenadines.

1. Introduction

This Policy summarises how ApogeeX takes reasonable steps to achieve the best possible result for clients when executing their orders in Forex and CFDs. It forms part of the Client Service Agreement. By accepting the Client Service Agreement, you consent to this Policy and to your orders being executed outside a regulated market or exchange.

2. Execution Venue

ApogeeX acts as principal and is the execution venue for all client orders. Transactions are over-the-counter contracts between you and ApogeeX, and positions can only be closed with ApogeeX.

3. Pricing

Our prices are derived from price feeds received from third-party liquidity providers, which allows us to provide competitive prices, including during volatile market conditions. Our prices include our spread. Any commission depends on the account type and is set out in the trading conditions published by ApogeeX. As a result, our prices may differ from prices quoted on an exchange or by other providers for the underlying instrument. We do not quote prices outside the trading hours of the relevant instrument.

4. Execution Factors

When executing orders, we take into account:

- price;
- costs, including spreads, commissions and financing charges;
- speed of execution;
- likelihood of execution and settlement;
- order size and type; and
- any other consideration relevant to the order.

For retail clients, price and total costs will generally be the most important factors. In some market conditions, such as high volatility or low liquidity, speed and likelihood of execution may become more important.

5. Order Types

Orders are executed through the MetaTrader 5 (MT5) platform. Available order types include market orders, limit orders, stop orders and stop-loss and take-profit orders, as enabled for each instrument. Market orders are executed at the best available price at the time of execution, which may differ from the price displayed when the order was submitted. Pending orders are executed when the market reaches the specified price, at the next available price.

6. Slippage

Slippage is the difference between the requested price of an order and the price at which it is executed. It may occur during periods of high volatility, low liquidity or when the market opens after a gap. Slippage can be positive or negative.

7. Specific Instructions

Where you give a specific instruction, such as a limit price, and we accept the order, we will handle it in accordance with that instruction and the Client Service Agreement. Limit and stop orders are not guaranteed to be executed at the specified level. A specific instruction may prevent us from taking the steps described in this Policy to obtain the best possible result for the elements covered by the instruction.

8. Monitoring and Review

We review the quality of our execution and this Policy periodically. The current version is published at axfx.com.

9. Contact

Questions about this Policy may be sent to support@axfx.com. Complaints may be sent to complaints@axfx.com.
